## "Fund Faculty Research and Host Distinguished International Visitors"

### Going Well:

We have awarded more than \$72,000 to host a diverse group of researchers from several countries.

### Project Description:

Global Oregon Faculty Collaboration Fund supports collaboration between UO faculty and international scholars from top universities worldwide by funding them to be in residence at the UO . Since 2014, we have funded visiting faculty from 22 different locations and 20 different departments.

### Lesson Learned:

We have learned that these residencies are very complex, so we must involve as many units on campus as possible in the early planning phase.

### Challenge:

Develop better ways for the scholar to engage with the broader UO community.
